

Expressive Art

Paper Mache bugs and animals!

We will be creating some fabulous paper mache bugs and animals using balloons. With a choice of decorating materials, children will be encouraged to think carefully about how to apply their chosen materials to create a lifelike looking bug!

Let's get ready for Reception!

Our focus for the second half of the summer term will be on the transition into reception.

We will be discussing the new changes as well as celebrating the children's Nursery achievements.

Personal, Social and Emotional

Parent/Carer Input and Feedback

At Ozzy's Little Owls Nursery we really value your ideas and feedback. At the end of every half term we will send you a topic web like this to tell you about the exciting learning opportunities and experiences that your children will be taking part in over the next half term. To give us your feedback, please fill in the attached slip and put it into the envelope on our Topic Board.

Physical Development

We'll be focussing on different animal movements, from large galloping horses to small wiggly worms. How many different ways can you move?
The children will be encouraged to use the hall apparatus with safety and tackling new challenges!

Understanding of the World

IPad's Galore!

We will be introducing the children to the school's iPads once a week, which will include creating farm animal pictures as well as teaching the children how to research them!

Enrichment

This half term we are planning on visiting a farm to take a look at where lots of our food comes from.

Communication and Language

What's your favourite animal down at the farm?

The children will be exploring a wide variety of fiction and non-fiction texts about animals. We will be starting with Farm Yard Hullabaloo and go onto reading texts such as Farmer Duck, The Bad Tempered Ladybird, Rosie's Walk and The Little Red Hen.

Maths

How many different ways are you able to sort?

A farm is full of different animals of all shapes and sizes! This half term, we will be enhancing problem solving skills, starting with sorting different animals, and then we will move onto using the animals to help us with our adding and subtracting skills in a fun and active way.
