

Hubble, Bubble, Boils & Trouble!

History The Plague

In history, we will be travelling back in time to find out all about the Plague. We will be learning about the beak doctors, the searchers and what their jobs were. We will also find out how people suffered during the Plague and how cures were used to help make them better.

ICT Photostory

In ICT, we will be making our own photostory all about the Plague using writing, pictures and sounds to tell our story. We will be learning how to input pictures and sounds as well as how to save and retrieve our work.

Religious Education New Life

In RE, we will be learning how Christians believe the world started by reading their Creation story.

Music

In music, we will be learning how to control and develop our singing voices as well as how to control instruments.

Science Food

This half term, we will be learning all about healthy eating and a balanced diet. We will also be finding out about where our food comes from and comparing food chains.

Maths

This half term, we will be exploring measures by estimating and comparing weights, lengths and capacities. We will be linking this to our topic by creating our own Plague potion. We will be learning how to read scales and interpret divisions. We will also be looking at money and using strategies to add totals and find change. Finally, we will consolidate these skills by looking at word problems.

English

In English, we will be reading different traditional stories such as Cinderella, including modern versions and stories from other cultures. We will explore common themes of traditional stories and use them as models for writing our own. For our non-fiction reading and writing we will be looking at information books which give explanations, to find out how this kind of information can be presented clearly.

Design and Technology Clay

In design and technology, we will be working with clay to create a pot to carry London Treacle. We will design our pot based on our research and then create our pot using a range of tools and techniques.

Physical Education Games

In games, we will be playing and inventing simple invasion games in teams.

Gym

We will be learning to control our movements and link them together.

Enrichment and Trips

We are hoping to visit the Lowry to take part in a drama workshop linked to our topic of 'The Plague'.

Rights Respecting: Articles 6 & 24

Every child has the right to life. All children have a right to good health and good quality health care.
