

# Around the World in 30 Days

## MATHS

And you thought that the weather was bad in Manchester?! This term we will be looking at temperature and how cold it can really get in Antarctica! Also, we will be seeing how much we can get for our money when we discover how currency works. We will be linking our maths to topic even more by presenting data in different ways.

## ENGLISH

Our pencils have been on fire this term with all of the amazing writing that we have been doing! So our teachers think that we should share it with other countries. As part of our topic we will be communicating via letter and postcards to other schools abroad. But will they reply?

## HOOKS and ENRICHMENT OPPORTUNITIES

Fancy a visit to the airport? Well, this is where we will be going on our next school trip. We will get the opportunity to look around a real aircraft, then explore Terminal 2 in action!

## GEOGRAPHY

Get your suitcases packed, you can never be too prepared! There are many environmental issues that people face and we will learn all about them when we become weather boys and girls.

## ART

We will be exploring art from other countries and dusting off those paint brushes to get creative! We will be focusing on pattern and colour used in artwork all over the world.

## MUSIC

Now, we all know that Year 4 love to make LOTS OF NOISE! So, in music, we will be exploring sounds from around the world. The carnival is coming to town!

## ICT

We will be creating our own worlds using the Kodu programme. Get creative!

We would love to hear from parents and carers about our new topic – if you have any ideas please return them on the slip provided!

## RIGHTS AND RESPONSIBILITIES

Article 30 – Everyone has the right to learn about their own cultures, languages and religions.
