

# **CREATIVE WRITING IS BACK FOR 2026!**

THE WONDERFUL WORLD OF CREATIVE WRITING!

Writing is proven to be excellent for emotional well-being and is like yoga for the mind. These sessions will not only boost literacy skills but will also teach your child mindfulness techniques, such as how to journal and use gratitude exercises to raise their vibrations and develop their own unique voice.

English is the lifeblood of our language. Children will learn advanced narrative techniques that will support them across the curriculum. To write well is to communicate well — and being able to articulate and express oneself clearly is a skill for life.

Designed by our company director, who holds an MA in Creative Writing and is a published writer, these sessions are extremely popular and help establish an early love of writing.

Writing is like yoga for the mind, and learning to write across different genres not only builds creativity and imagination but also encourages confidence and supports progress towards GCSE English.

There are so many incredible opportunities the wonderful world of Creative Writing can open — it's fun, exciting, and can even lead to an amazing career.

So, let's get writing — and inspire the next J.K. Rowling today!
